

Conference Days - The Future of Free Trade Zones

June, 3 and 4

Whatever the name given, free trade zones (special economic zones, export processing zones, etc.) have become a major player in international trade and global value chain. Emerging and developing countries use them to attract foreign investment, boost their trade and speed up their industrialization. But, what about their economic and social performances?

Two conference days are organized to address these issues.

Website : ftz.dauphine.fr

Day 1

2015, June 3 - Free Trade Zones: a Model for Developing Countries?
University Paris-Dauphine, room Espace One, 1st Floor, Main Building

- 11:30 Questions
- 12:15 Conclusion

These two days are organized within the framework of a project funded by the French National Research Agency (ANR) as part of its program: "Les Suds II" (see: ftz.dauphine.fr)

Research has been led by the research centre DIAL (<http://www.dial.ird.fr/>)

DIAL associates Paris-Dauphine University and IRD (Institut de Recherche pour le Développement).

Aspects related to the contribution of FTZs to reducing poverty are also concerned by the European project (FP7) NOPOOR (www.nopoor.eu).

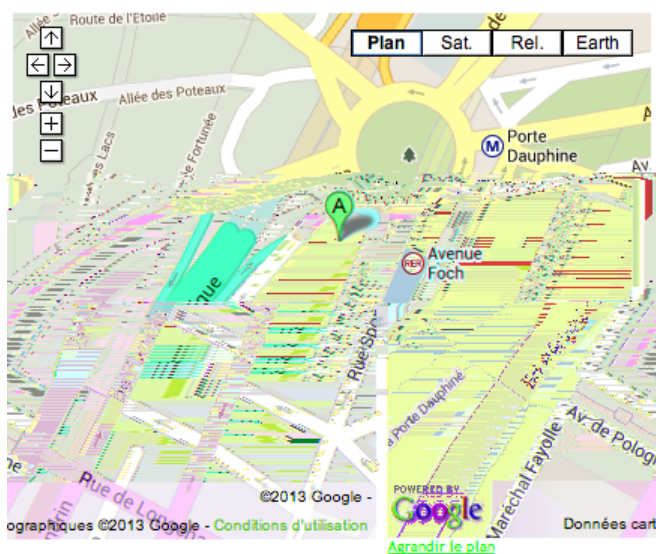

The second day is included in the program of the Week of Latin America and Caribbean.

This event also involves the Institute of Economics of the Federal University of Rio de Janeiro (UFRJ) and the Federal University of Amazonas (UFAM).
